# **1. DOR PROGRAMME OBJECTIVES**

The research work in respective fields has become almost a compulsion for every company to survive in this competitive world. Many companies in the United States and Europe accepted the concept of constant research in earlier days and that's why they were leading the world.

Many Indian companies who have to compete in the international market with other MNC 's had to use the same concept. Even the small companies have also started to provide for research expenditure in their budget as a matter of survival in this stiff competition. In each and every phase of research, analysis of data is essential and for such analysis techniques of operation and research are used. So a student can equip himself with different analytical tools through this course.

In future it is certain that the research work will increase and there will be no reduction in the research work so a student can choose his career in the analytical field and good combination of knowledge of operation research tools and computer techniques will give him success. So the proposed course can be of immense help to those students.

## 9. STUDENT SUPPORT SERVICES

In order to provide individualized support to its learners, the University has created a number of Study Centres throughout the State for this Programme.
